Global Fund Domiciles & Governance Forum 2013

Millennium Hotel, 44 Grosvenor Square, London W1 – Thursday, February 7, 2013

Increasing investor interest in fund governance and servicing issues as well as domiciliation have made the subjects being discussed at this event more compelling for the asset management industry. (Research conducted by IFI with investors shows growing involvement by them in these areas of the business.)

Added to which, established patterns of fund domiciliation are coming under greater scrutiny as a result of the AIFM Directive and other regulatory measures.

All this will all be discussed in detail at this event – including the implications for both the EU and offshore jurisdictions.

Sponsored by
